

Travel advice: outbreak of a novel coronavirus 2019-nCoV

Travelers from China

In case of developing symptoms suggestive to respiratory disease before, during or after travel:

- Avoid close contact with other people and seek medical care from specialist on infectious disease and if it is not possible, from general practitioner;
- Use mask and be sure to cover mouth and nose;
- Avoid public transportation;
- Be sure to inform the health care provider about details of your trip - dates of departure and return, length of stay, places where you resided, possible contacts with sick people, visits to animal markets or contacts with animals.

If you become sick with symptoms of respiratory infection while traveling immediately inform plane crew.

Travelers to China

Avoid contact with sick people, in particular those with a cough as well as crowded places and mass events.

Avoid close contact with live or dead domestic or wild animals and surfaces that were in contact with them.

Avoid consumption of raw or undercooked animal products.

Wash your hands with soap and water or use an alcohol based disinfectant solution.

- Use mask and be sure to cover mouth and nose. Avoid touching mask once it is on.
- Avoid touching your eyes, nose and mouth;
- When coughing and sneezing cover mouth and nose with disposable paper handkerchief. Do not use the palm of your hand.
- If you have fever, coughing and difficulty breathing, seek immediately medical care and share travel history information with the health care provider.
